Profile Summary

Web UX Designer & Developer with 2 years of hands-on experience in building and maintaining web applications, 3 years of hands-on in Strategic UX Designing, and 6 months of Professional Experience using Full-Stack tools including ReactJS, NodeJS, PHP and Laravel along with SEO Optimization & Digital Marketing. Experienced in developing 4+ full-stack projects, implementing MVC architecture, RESTful APIs, and optimized MySQL database structures & MongoDB Clusters. While also designing responsive and user-friendly frontend interfaces using modern web technologies. Demonstrated ability to write clean, maintainable code and improve application performance through structured development practices. Passionate about continuous learning and delivering scalable, efficient web solutions in collaborative development environments.

Technical Skills

Programming & Frameworks: Python, HTML, CSS, JavaScript, ReactJS, PHP, Laravel, NodeJS, Java, Flask, Bootstrap, REST API.

Python Libraries: scikit-learn, matplotlib, numpy, plotly, pandas, seaborn, gradio, streamlit, hugging-face, tensorflow.

Database: MySQL, MongoDB.

Tools & Testing: Figma, Framer, MS Excel, Power BI, VS Code, GitHub, Selenium IDE, Jupyter Notebook, Postman, Generative AI Tools.

Work Experience

UI/UX Researcher, Designer & Developer – Articea

March 2025 - June 2025

My role involved designing intuitive e-commerce interfaces through user research, wireframing, and high-fidelity prototyping in Figma, while collaborating with developers to enhance user experience and product flow.

- Conceptualized and constructed 30+ user interface mock-ups and wireframes for an e-commerce platform utilizing Figma, incorporating user research findings to create intuitive and optimized product discovery flows.
- Conducting user research and competitor analysis to understand design trends and improve usability.
- Creating wireframes, high-fidelity prototypes, and interactive mock-ups using tools like Figma, Adobe Illustrator & Canva.

SEO Optimization & Digital Marketing Intern – Vanillakart

March 2025 - May 2025

I was responsible for executing SEO and digital marketing strategies & posts across multiple platforms, creating backlinks, optimizing content, and driving measurable growth in organic traffic and brand visibility.

- Managed SEO and digital marketing for 7+ clients across diverse industries through off-page optimization.
- Created over 200 high-quality backlinks and published 120+ guest post articles, contributing to a 25–40% increase in organic traffic.
- Designed 50+ creative social media posts and promotional visuals, boosting client engagement and brand awareness.
- Utilized Search Console of SemRUSH to monitor performance, resulting in a consistent 30% growth in impressions.

WordPress Developer Intern - Vanillakart

Dec 2023 - Jan 2024

I contributed to building a fully responsive e-commerce website using WordPress and Elementor, improving UX/UI, managing product databases, and ensuring seamless mobile compatibility and performance.

- Developed & launched a fully responsive E-commerce website using WordPress, Elementor, HTML & CSS, improving UX/UI by 15% and ensuring 100% mobile compatibility.
- Managed a database of 100+ products and improved navigation and product searching.
- Integrated plugins and SEO tools to enhance performance, analytics, and product visibility.

Projects

SmileCraft Dental Studio - Full-Stack Dental Clinic Website - Live ([Project Link](#))

Built a production-ready dental clinic web application with real-time appointment booking, automated email notifications, and a secure admin dashboard for clinic management.

- Developed a Node.js + Express REST API with 3 route modules and 7+ endpoints connected to MongoDB Atlas across 2 collections for persistent cloud data storage.
- Implemented real-time slot booking across 14 daily time slots with conflict detection, preventing double bookings by validating availability before confirming each appointment.
- Integrated Nodemailer with Gmail SMTP to auto-send 2 transactional emails per booking — a branded confirmation to the patient and an instant alert to the clinic admin.
- Built a JWT-secured admin dashboard with 8-hour session tokens, patient search, date filtering, and 3-state appointment status management (pending, confirmed, cancelled).

Gym Management System ([Project Link](#))

Built a full-stack Gym Management System managing members, subscriptions, employee records, and payments via a centralized admin dashboard.

- Developed 4 CRUD modules — member registration, employee management, subscription plans, and payment tracking.
- Implemented JWT authentication with role-based access control (2 roles) for secure admin operations.
- Optimized MySQL schema across 8+ tables, improving query retrieval efficiency by ~30%.
- Applied MVC architecture using Laravel, reducing code redundancy by ~25%.

Laravel Company-Employee Admin Web Application [\(Project Link\)](#)

This project is a dynamic web application built using the Laravel framework with a focus on scalable backend architecture.

- Developed a full-stack application using MVC with 10+ core features including authentication and CRUD operations.
- Created 15+ RESTful routes and controllers for efficient request handling.
- Managed 5+ database tables using Eloquent ORM, improving data handling efficiency by ~30%.
- Implemented secure authentication and reduced development time by ~25% using Laravel tools.

UX/UI Projects and Designs [\(Project Link\)](#)

- This is the portfolio link that represents my sense of designing styles and prototyping along with the 10+ projects. These projects show my professionalism in visualization and UI designing.

Education

Thakur College of Engineering & Technology, Mumbai

2021-2025

Bachelor of Engineering (Electronics & Telecommunications), CGPA - 9.04/10

Achievements & Certifications

- Outperformed 25 Professional Corporate Teams and placed Top 5th position in FoF Mumbai 48 Hours Design Hackathon 2025.
- 1st Runner-Up in TCET organized Mind's-Eye Project Competition in Health Care & Services.
- 6 Months Data Analytics with Gen AI Bootcamp on Coding Ninjas.
- 3 Months Machine Learning Specialization Course Certificate from "Deeplearning.AI" by Coursera
- Multicon-W 2024 Pre-Conference Workshop: 'Full Stack WordPress Web Development' Certificate
